

# TAM SAATLER

Saatler zamanı ölçmeye yarayan aletlerdir. Saatlere bakarak günün hangi anında olduğumuzu anlarız. Günümüzü planlarken saatlerden faydalanırız. Zil ne zaman çalacak? Beslenmeyi ne zaman yapacağız? Bunları saate bakarak öğreniriz.

Saatlerde iki çubuk bulunur. **Yelkovan** uzun olan çubuktur ve **dakikayı** gösterir. Akrep ise kısa olan çubuktur ve **saati** gösterir.

2:00

**Yelkovan** 12 'yi gösterdiğinde **tam saati** göstermiş oluyor. **Akrep** 2 'yi gösteriyor. O zaman saat **2** dir.

Aşağıdaki saatlerin kaçı gösterdiğini yazınız?

## YARIM SAATLER

Yelkovan 6'yı gösterdiğinde yarım saati gösterir. Yarım saatlere **buçuk** deriz. Akrep 3'le 4 arasında. O zaman saat **3:30** ( üç buçuk )
